It is not known when sheepskin boots,or shearling boots were first used by human.But we can imagine that far back spurs ginobili jerseywhen our ancestors were still hunting tribes they might use some animal skins to protect their feet in cold weather.

The animal skins used include cow skin,sheepskin,wolf skin,deer skin,and all kinds of others.

It is understandable that our ancestors,after many many tries and experiments,found that sheepskin is the best gift of nature.It is soft,supple,thermostatic.The fleece of sheepskin has excellent insulating stephen jackson jerseyproperties and it is also resistant to flame and static electricity. Wool is considered by the medical profession to be hypoallergenic.

Time has come to 20th century.World War I,Australia.Pilots of aero fighers began to wear a kind of boots made of full sheepskin.This was a kind of footwear made of twin-faced sheepskin with fleece on the inside and with a tanned outer surface.They called it "fug boots",which stands for "flying ugly boots".

This is said to be the modern inception of sheepskin footwear.Newmanu ginobili jersey Zealand also claims that it is their aviators who first used the fug boots.
